## Education Opportunities: NRP plus, SickKids Conference, and Women's Health Day

1) Network Sponsored NRP plus Course — Register today! **Only 15 seats remaining**, November 16th 8:30—17:00 (see registration form attached). Note: course covered by the Network, exam to be covered by individual attendees

2) SickKids T4 Health Neonatology Conference: Triage, Transport, Treatment, and Transition. Theme: 'The Big Four: Heart and Lungs, Bowel and Brain' offers an interprofessional perspective on each topic facilitated by members of SickKids NICU faculty, nurse practitioners, physicians, nurses, respiratory therapists, and the ACTS team. Registration information [HERE](#)

3) Barrie Women's Health Day—November 23rd 12:00—5:00 pm: Women, Hormones and ADHD, Managing Migraines in Primary Care, Updates on Contraception Options, Treating Obesity in Primary Care, A New Direction in Oral Contraception. Registration information [HERE](#) (poster attached)

## Stevenson Memorial Hospital Joins the Network

In alignment with our Network's strengths in partnership, collaboration, and inclusion, on September 28th, Stevenson Memorial Hospital has been added to our Network. With the aim to assist our broad health care community, we would like to warmly welcome Stevenson Memorial and look forward to the great opportunities their addition will bring to our team.

## Pregnancy and Infant Loss Awareness Day October 15th

On October 15th we will pause in remembrance. We invite you to light a candle at 7pm to remember our smallest family members lost too soon. This is known as the Wave of Life.

This month, we would like to share important resources like those provided through [Bridget's Bunnies](#), and acknowledge the important contributions of our patient and family advisors, particularly, Theresa and Mat Morrison, Nicole Leijh and their families for sharing their experiences. Due to their great contributions to our Network, we now have a Pregnancy Loss and Complications Task Force. In addition to advocacy, our Network is committed to working on important initiatives to improve the care reaching families experiencing pregnancy and infant loss.

## Canadian Patient Safety Week: October 24-28 — Safe Administration of Oxytocin

In acknowledgement of Canadian Patient Safety Week and as one of the highest risk medications used in obstetrical practice, please familiarize yourself with PCMCH's Safe Administration of oxytocin tool kit. This QR code links you directly to the guideline report, decision tree, patient education pamphlet (English and French), pre- and in-use safety checklists and more.

If you received this Newsletter indirectly and would like to be added to the distribution list,
